

THE CO₂ SCRUBBER™

PATENT PENDING

Does This Look Familiar?

Calcium	Alkalinity	PH
420 mg/l	11 dKH	7.81

Raise your pH without chemical additives.

- Raises pH naturally by removing excess carbon dioxide from tank water.
- Raises pH an average of .05 to .23 points.
- Connects to the air input on your Protein Skimmer. Stays dry- no contact with tank water.
- Increases Skimmer production.
- Reduces Film and Hair algae.
- Media lasts 1 - 3 months, depending upon skimmer air volume.
- Color changing media indicates when cartridge needs replacing.
